

# Security Practices – Critical Checklist

<b>Business Risk Assessment</b>	
Identify most critical systems; ensure they are given the highest priorities for all hardening and monitoring activities	
<p style="text-align: center;"><b>Active Directory Hardening</b></p> <ul style="list-style-type: none"> <li>Minimize number of admins</li> <li>Monitoring and alerting (Windows Event ID #566)</li> <li>Two factor admin access from hardened VDI platform</li> <li>Executable whitelisting on hardened DCs</li> <li>Disable default account and rename key accounts</li> <li>Complex passwords (9 &amp; 15 Char)</li> </ul>	<p style="text-align: center;"><b>Infrastructure &amp; Logging</b></p> <ul style="list-style-type: none"> <li>Full and detailed logging &amp; analysis</li> <li>Tighten VPN controls</li> <li>Increase controls on crypto keys</li> <li>Full packet capture at strategic network locations</li> <li>Network segmentation</li> <li>Team trained and focused on APT activity</li> </ul>
<p style="text-align: center;"><b>Service Accounts</b></p> <ul style="list-style-type: none"> <li>Review accounts for privilege creep</li> <li>Change passwords frequently</li> <li>Do not embed credentials into scripts</li> <li>Minimize interactive login</li> <li>Restrict login only from required hosts</li> </ul>	<p style="text-align: center;"><b>Web Access</b></p> <ul style="list-style-type: none"> <li>Block access to high risk and web filter categories</li> <li>Click through on medium risk websites</li> <li>Black hole dynamic DNS domains</li> <li>Authenticated internet access</li> <li>DNS traffic analysis</li> </ul>
<p style="text-align: center;"><b>User Education</b></p> <ul style="list-style-type: none"> <li>Increase security training for IT</li> <li>Launch security improvement initiative</li> <li>Regular education of users on phishing attacks</li> <li>Regular education on social engineering</li> <li>Increase mail filtering controls</li> </ul>	<p style="text-align: center;"><b>User Machine Hardening</b></p> <ul style="list-style-type: none"> <li>Limit local admin and randomize PW- change often</li> <li>Increase patching regiment</li> <li>Enable security controls in applications</li> <li>Deep visibility to identify lateral movement</li> <li>Limit use of non-authorized and unapproved software</li> </ul>
